CLIMAX-SCOTTS COMMUNITY SCHOOLS PASSES 2023 BOND PROPOSAL

Thank you to all our Climax-Scotts residents, our Panther family, who supported our recent bond proposal. This will be excellent for our students, staff, and community. We are excited to start the design and input phase.

The bond project improvements will enhance our ability to provide C-S students with excellent academic experiences and education that focuses on the whole child. Students get daily practice with increasing academic skills, improving social skills, and regulating emotions when situations arise so students can be well-rounded, contributing members of society. We put an emphasis on 21st century skills with real-life, authentic application learning and preparation for college and career readiness so our students have choices for wherever their journey through life takes them. They receive encouragement to participate in extra-curricular activities and opportunities which accomplish many goals for our district. We attract new families so new friendships can be built. More families generate increased revenue, which can be applied to additional student and staff resources, providing more opportunities for our students. We work diligently to keep our students engaged in school and develop strong social skills and improve students' academic success and enjoyment in their overall K-12 school experience.

Please see the summary below of intended projects.

Highlights of Bond Proposal Goals:

Elementary

- Secure front entrance
- Improved classroom air quality
- New windows & EFIS
- Additional classrooms
 - Need more K-5 classrooms for student support.
 - Additional classrooms due to more students from the State's Universal Pre-K initiative
 - Space for additional itinerant staff that support students.
- Addition of new daycare with secure entrance
- Multi-purpose room due to overcrowding of current gym/cafeteria.
- Updated corridors and bathrooms.

Jr/Sr High School

- Improvements for Academics
 - Updated and improved science labs
 - Updated and improved greenhouse
 - Updated space for robotics class
- Safety & Updated Facilities
 - New sidewalk along main drive
 - Improved air quality in main gym
 - Updated corridors and bathrooms
 - New classroom/courtyard windows
- Athletics
 - Updated baseball/softball
 - Improved wrestling facilities
 - Updated bleachers
- Miscellaneous equipment, technology, and transportation
